PURPOSE AND FUNCIONALITY

"Corrective Invoices" is a module developed by 4webs in order to facilitate its user the billing process of payment returns, pioneering the **possibility of making partial returns**.

Consequently, the module will allow you the the invoice relation with any previous sale and automatically generate the corrective one that bills the refund of that purchase. However, it is possible to select only those specific products or concepts that you want to return.

They will appear on the generated invoice, separated into two columns, the unit price and total price, both negative. It is also posible to edit prices without taxes, appearing as included in the final invoice.

In addition, this module allows you to edit all corrective invoices from the same order and include comments that will appear in all of them, and others just for a single one.

TECHNICAL DESCRIPTION AND REQUIREMENTS

VERSION: 1.0.2

COMPATIBILITY: v1.5.0.0 - v1.6.1.3

LAST UPDATE: 21-01-2016

INSTALLATION AND CONFIGURATION

First, you need to upload the file to the server module. Later, you can find it in your browser module and click on the option "Install". You can also access a faster through the "Orders" section, in which you'll find the module included.

Next, are shown different screenshots that graphically explain the simple setup process of "Corrective Invoices". Once installed, locate the module at your Prestashop list and access to your choices via the "Configure" button showed in the image below.

The screenshot displays the 'List of modules' interface in Prestashop. At the top, there are navigation links for 'Check for update', 'Add a new module', and 'Help'. Below this, a summary bar shows 'Installed Modules: 70', 'Disabled Modules: 0', and 'Modules to update: 0'. The main section is titled 'MODULES LIST' and includes a search bar containing 'corrective invoices'. A sidebar on the left lists various categories with their respective counts. The main content area shows a list of modules, with 'Corrective invoices v1.0.3' by 'www.4webs.es' selected. A blue arrow points to the 'configure' button next to this module.

Category	Count
All	185
Administration	14
Advertising and Marketing	9
Analytics and Stats	27
Checkout	2
Comparison site & Feed ma...	4
Dashboard	4
Emailing & SMS	4
Export	1
Front office Features	49
Marketplace	6
Merchandising	3

Once inside, you will find the next options:

The screenshot shows a web interface for managing corrective invoices. At the top, there is a breadcrumb trail: 'Orders / Facturas rectificativas / Abonos'. The main title is 'Facturas rectificativas / Abonos'. A 'Help' icon is in the top right corner. The interface is divided into three main sections:

- CORRECTIVE INVOICE CONFIGURATION:** This section contains three input fields:
 - 'Set' with the value 'AB23' (callout 1).
 - 'Number' with the value '20' (callout 2).
 - 'Comment' with the placeholder text 'Write a general comment' (callout 3). Below this field is a note: 'Type here your comment for ALL corrective invoices'.A 'Save options' button is located at the bottom right of this section (callout 4).
- NEW CORRECTIVE INVOICE:** This section contains one input field:
 - 'Order ID' with the value '2' (callout 5).A 'Generate corrective invoice' button is located at the bottom right of this section (callout 6).
- A message box at the bottom states: 'There are not corrective invoices'.

1. In this field, type a serial number as a corrective invoice name.
2. Here the numbering of invoices appears, it must autoincrease. If you repeat the number, the process will start again.
3. In this section you can write a commentary that will appear at the bottom of all corrective invoices.
4. Before proceeding, save the above changes.
5. Choose the order number for which you want to make the repayment. You can only choose previously billed orders.
6. Here you may include a specific comment at the bottom of this corrective invoice in particular.

In this point, you will find the next options:

Go Back

Download PDF

1. Select the products of the order you want to return.
2. Choose the amount to be refunded. Remember that it can not exceed the previous invoiced order.
3. Press this field to edit the unit price.
4. The cost of shipping options, discounts and others may be also edited.
5. In this third column, you can find the subtotals and the total amount to be paid, according to previously established parameters.
6. Click "Back" if you want to return to the setup screen.
7. Click on "Download PDF" to generate and download the corrective invoice.

At this point, you will be redirected to the main configuration screen, where you can view, delete or download all the generated corrective invoices.
