Purpose & functionality

Promofarma Market Place is a module developed by 4Webs, designed to connect your store to the Promofarma Store network, a offer and discount aggregator for pharmaceutical products.

From the module configuration's page you'll be able to choose which manufacturers will be exported to the Promofarma CSV, fiche that Promofarma will use to download your store's catalog.

Technical description & requirements

VERSION: 1.0.0

COMPATIBILITY: 1.6.0.6 – 1.7.6.2

Other useful modules and support

Check out all our modules and get additional support in [our online store](#).

Install & configuration

In first place, you need to upload the module zip to the server, after that you'll find it on the modules searcher, to install it you need to click on the "Install" button. Once it's installed you can access faster through the orders menu in the sidebar.

In the next pages, you can see various screenshots that will explain how to use the module.

This module has a configuration page, you can access this page clicking the “Configure” button in the module list.

The screenshot displays the PrestaShop 1.7.6.2 Module Manager interface. The left sidebar contains navigation menus for 'SELL' (Orders, Catalog, Customers, Customer Service, Stats), 'IMPROVE' (Modules, Design, Shipping, Payment, International, Advertising), and 'CONFIGURE' (Shop Parameters, Advanced Parameters). The main content area is titled 'Module manager' and includes tabs for 'Modules', 'Alerts', and 'Updates'. A search bar at the top of the main area contains the text 'promofarma'. Below the search bar, there are filters for 'Category' (All Categories), 'Status' (Show all modules), and 'Bulk actions' (Uninstall). Under the 'Other' section, the 'Promofarma Market Place' module is listed with version 'v1.0.0 - by 4webs'. The description states: 'The Promofarma module allows to connect your store to the promofarma network'. To the right of the description are buttons for 'Configure', a dropdown arrow, and an unchecked checkbox.

FIRST LOCATE THE PROMOFARMA MARKET PLACE FROM THE
MODULE MANAGER

Once you are inside the module's configuration page, you can choose which manufacturers will be exported to the CSV file.

You can also set an increment price for the brand, if you put a 1.2 in the price increment field, the manufacturer price will be increased by 20%, also, you can choose the base price to use, the wholesaler or minorist.

Export CRON

Choose which manufacturers will be exported

Brand	Brand enabled	Price type	Increment
Graphic Corner	<input type="checkbox"/>	Wholesaler	1
Studio Design	<input type="checkbox"/>	Wholesaler	1

Check this field to use combinations ☐

Discard products without stock ☐

IN THE CONFIGURATION PAGE, WITH EXPORT TAB YOU CAN CONFIGURE THE MANUFACTURERS THAT WILL BE EXPORTED TO THE CSV FILE

You can also tune some other values like the combinations features or not (disabled by default) If you turn on this feature the different combinations will be exported as independent products.

YOU CAN ALSO MODIFY THE PRICE TYPE, USE OR NOT THE COMBINATIONS AND DISCARD THE PRODUCT WITH ZERO STOCK

If not, only one product will be exported, the price exported will be the base product price (wholeouser or minorist) and the stock will be all the combinations stock.

Also, you can discard the products without stock, they will not be included in the exported CSV file

If you scroll down the page, you'll get into the Optional fields table

Configure
Promofarma Market Place

Choose the fields that will be exported

Optional field	Enabled
LABORATORIO	<input checked="" type="checkbox"/>
MARCA	<input checked="" type="checkbox"/>
NOMBRE PRODUCTO	<input checked="" type="checkbox"/>
IVA	<input checked="" type="checkbox"/>
ID PROMOFARMA	<input checked="" type="checkbox"/>
CATEGORIA	<input checked="" type="checkbox"/>
CATEGORIA 2	<input checked="" type="checkbox"/>
CATEGORIA 3	<input checked="" type="checkbox"/>
FORMATO	<input checked="" type="checkbox"/>
PESO	<input checked="" type="checkbox"/>
URL IMAGEN	<input checked="" type="checkbox"/>
DESCRIPCION	<input checked="" type="checkbox"/>

The CN field should be Reference or UPC Reference

Choose which feature should be format Composition

Click to generate and download the promofarma CSV

Generate and download CSV

BOTTOM IN THE SAME TAB YOU'LL FIND THE OPTIONAL COLUMNS AND MAP WHICH DATA WILL FILL THE CN AND FORMAT COLUMNS

Not all the Promofarma fields are mandatory, because of this, you can disable or enable them.

The CN Column content can change, you can choose between SKU or reference to fill it.

Also you can Map the "Format" column, to any product attribute you have in the prestashop store.

In the CRON tab you can get information about how to execute the module (generate the CSV), you can copy the Cron execution URL to you CRON or scheduled tasks manager in your hosting or server to execute the exporter periodically.

FTP Server configuration, Configure to upload the CSV file to a remote server

Upload CSV to external ☐ FTP server after cron

UNDER THE "CRON" TAB YOU'LL GET USEFULL INFORMATION ABOUT HOW TO EXECUTE PERIODICALLY THE MODULE TO EXPORT THE CSV FILE AND THE FTP SERVER CONFIGURATION

Next to this, you can see the CSV download URL, this is the URL you have to provide Promofarma to let them know how to download your prestashop catalog.

Just after this, you can activate the FTP upload feature, with this option enabled, the file will be uploaded to a server after every execution

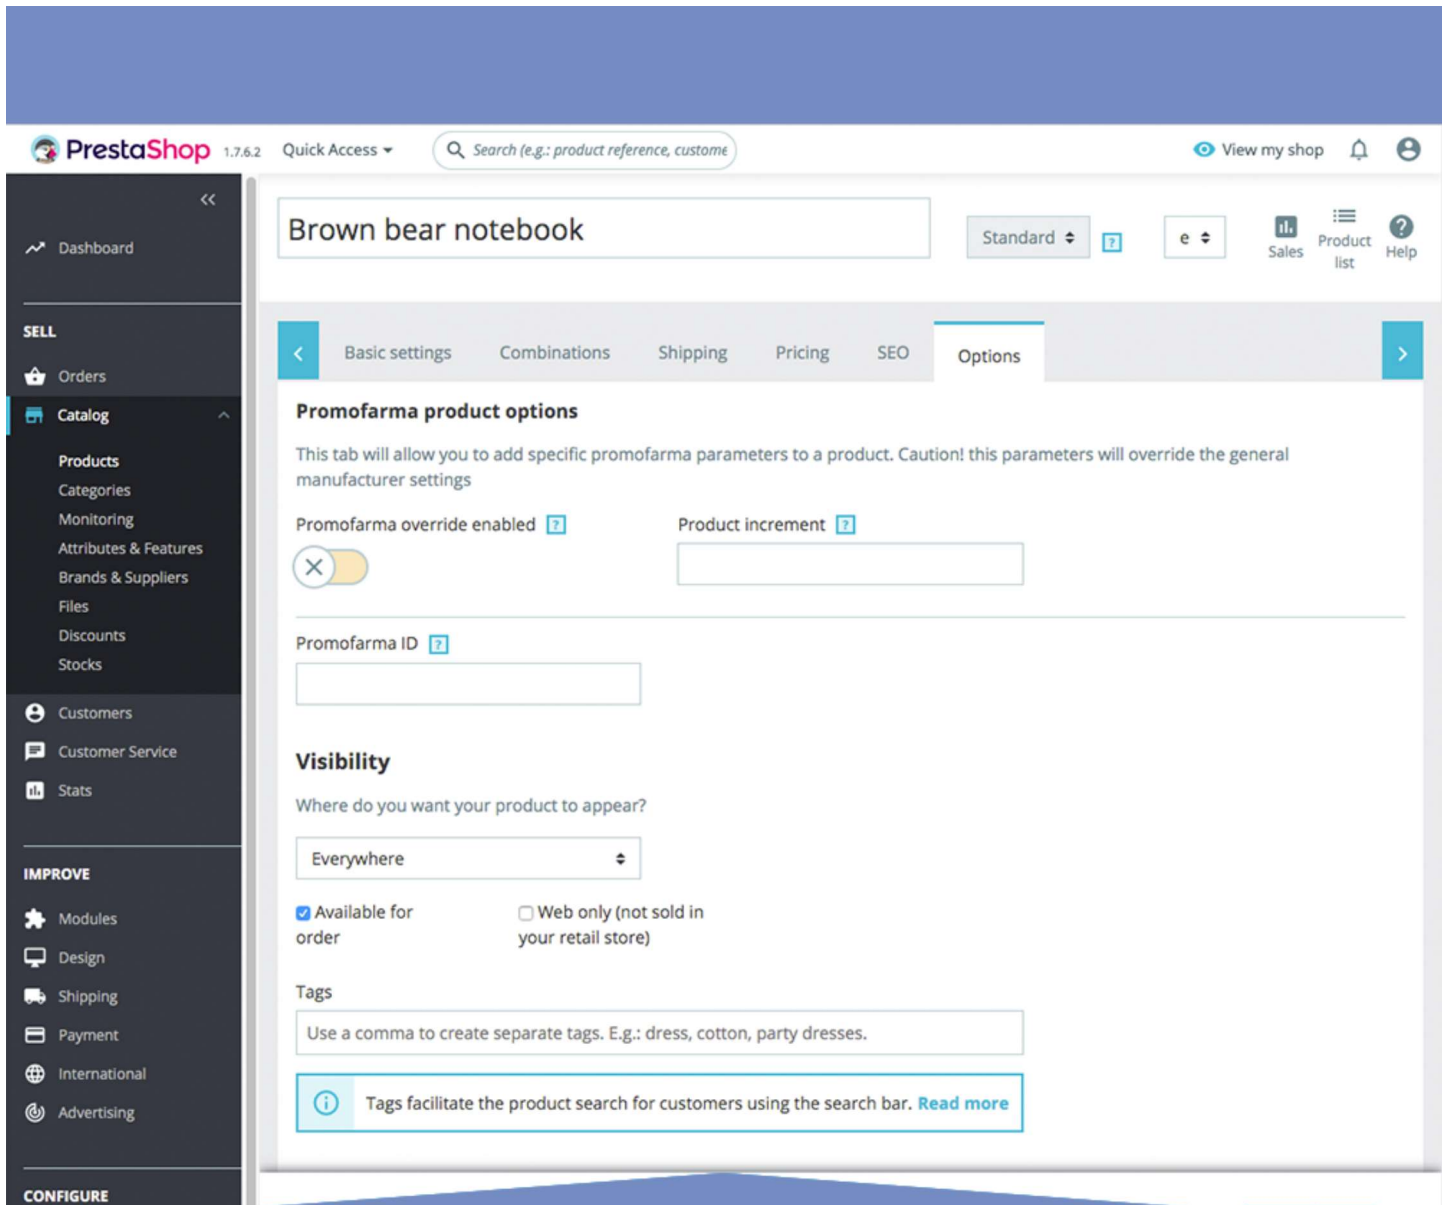

The screenshot displays the PrestaShop 1.7.6.2 configuration interface for the 'Promofarma Market Place' module. The 'Configure' page shows the 'FTP Server configuration' section. The 'Upload CSV to external FTP server after cron finished' checkbox is checked. Below it are input fields for 'FTP Server', 'FTP Username', 'FTP Password', 'FTP location path', and 'FTP port'. There are also checkboxes for 'Use Passive mode', 'Use SSL security', and 'Use implicit TLS'. A 'Save' button is at the bottom right. The left sidebar shows the 'IMPROVE' section with 'Modules' selected. The top navigation bar includes 'Dashboard', 'Orders', 'Catalog', 'Customers', 'Customer Service', 'Stats', 'Design', 'Shipping', 'Payment', 'International', 'Advertising', 'Shop Parameters', and 'Advanced Parameters'.

IF YOU WANT, YOU CAN CONFIGURE A FTP SERVER IN ORDER TO UPLOAD THE GENERATED CSV FILE AFTER THE EXPORT

Ask for your FTP configuration data to your services provider

¡CAUTION! Please, don't left checked the "Upload CSV to a FTP server" option if you no configure correctly the FTP server, if you do this, the CRON execution logs will show "With errors".

Further than setting a manufacturer price increment, you can adjust this increment and set other useful parameters at product level.

FURTHER THAN SETTING A MANUFACTURER PRICE, YOU'LL BE ABLE TO OVERRIDE THE CONFIGURATION FOR A SPECIFIC PRODUCT

To do this, all you need to do is: Go to a product inside the backoffice, and click on "Options" (For prestashop > 1.2.0.X) or under "Modules" (Prestashop 1.7.X to 1.7.2.X) or under "Promofarma" (Previous versions)

¡CAUTION! This is an manufacturer configuration override, that means if you have not selected their manufacturer in the module configuration page, even if you enable this, the product will not be exported into the CSV.

Product overriding manufacturer configuration example page:

The screenshot shows the PrestaShop 1.7.6.2 interface. The top navigation bar includes the PrestaShop logo, version 1.7.6.2, a 'Quick Access' dropdown, a search bar, and links for 'View my shop', a notification bell, and a user profile. The left sidebar contains a 'Dashboard' link and two main sections: 'SELL' (Orders, Catalog, Products, Customers, Customer Service, Stats) and 'IMPROVE' (Modules, Design, Shipping, Payment, International, Advertising). The 'CONFIGURE' section is partially visible at the bottom.

The main content area is titled 'Brown bear notebook' and features a 'Standard' dropdown menu. Below this is a tabbed interface with 'Options' selected. The 'Promofarma product options' section includes a warning: 'This tab will allow you to add specific promofarma parameters to a product. Caution! this parameters will override the general manufacturer settings'. It contains a 'Promofarma override enabled' toggle (checked), a 'Product increment' input field (1.35), and a 'Promofarma ID' input field (PR_f_31232423e). The 'Visibility' section asks 'Where do you want your product to appear?' with a dropdown set to 'Everywhere'. It also has checkboxes for 'Available for order' (checked) and 'Web only (not sold in your retail store)' (unchecked). A 'Tags' section includes a text input field with the instruction 'Use a comma to create separate tags. E.g.: dress, cotton, party dresses.' and an information box stating 'Tags facilitate the product search for customers using the search bar. Read more'.

IF YOU WANT TO APPLY CHANGES, THE MANUFACTURER NEEDS TO BE ENABLED AND THE "PROMOFARMA OVERRIDE ENABLED" TOGGLE SET TO ON

Since 1.0.0 version of Promofarma Market Place Module, you can import the daily excelreport files from Promofarma.

You can import these files as Orders or just decrease the stock quantity for the products in the file.

The screenshot displays the PrestaShop 1.7.6.2 interface for configuring the Promofarma Market Place module. The sidebar on the left includes sections for 'SELL' (Orders, Catalog, Customers, Customer Service, Stats), 'IMPROVE' (Modules, Design, Shipping, Payment, International, Advertising), and 'CONFIGURE' (Shop Parameters, Advanced Parameters). The main content area is titled 'Configure Promofarma Market Place' and includes navigation links like 'Back', 'Translate', 'Check update', and 'Manage hooks'. The 'Import' tab is active, showing configuration options for the import process. These options include selecting the import mode (Record order or Stock reduction), setting a customer ID to link orders, choosing an order status after import, selecting a carrier, and uploading a file for import. A 'Save' button is located at the bottom right of the configuration area.

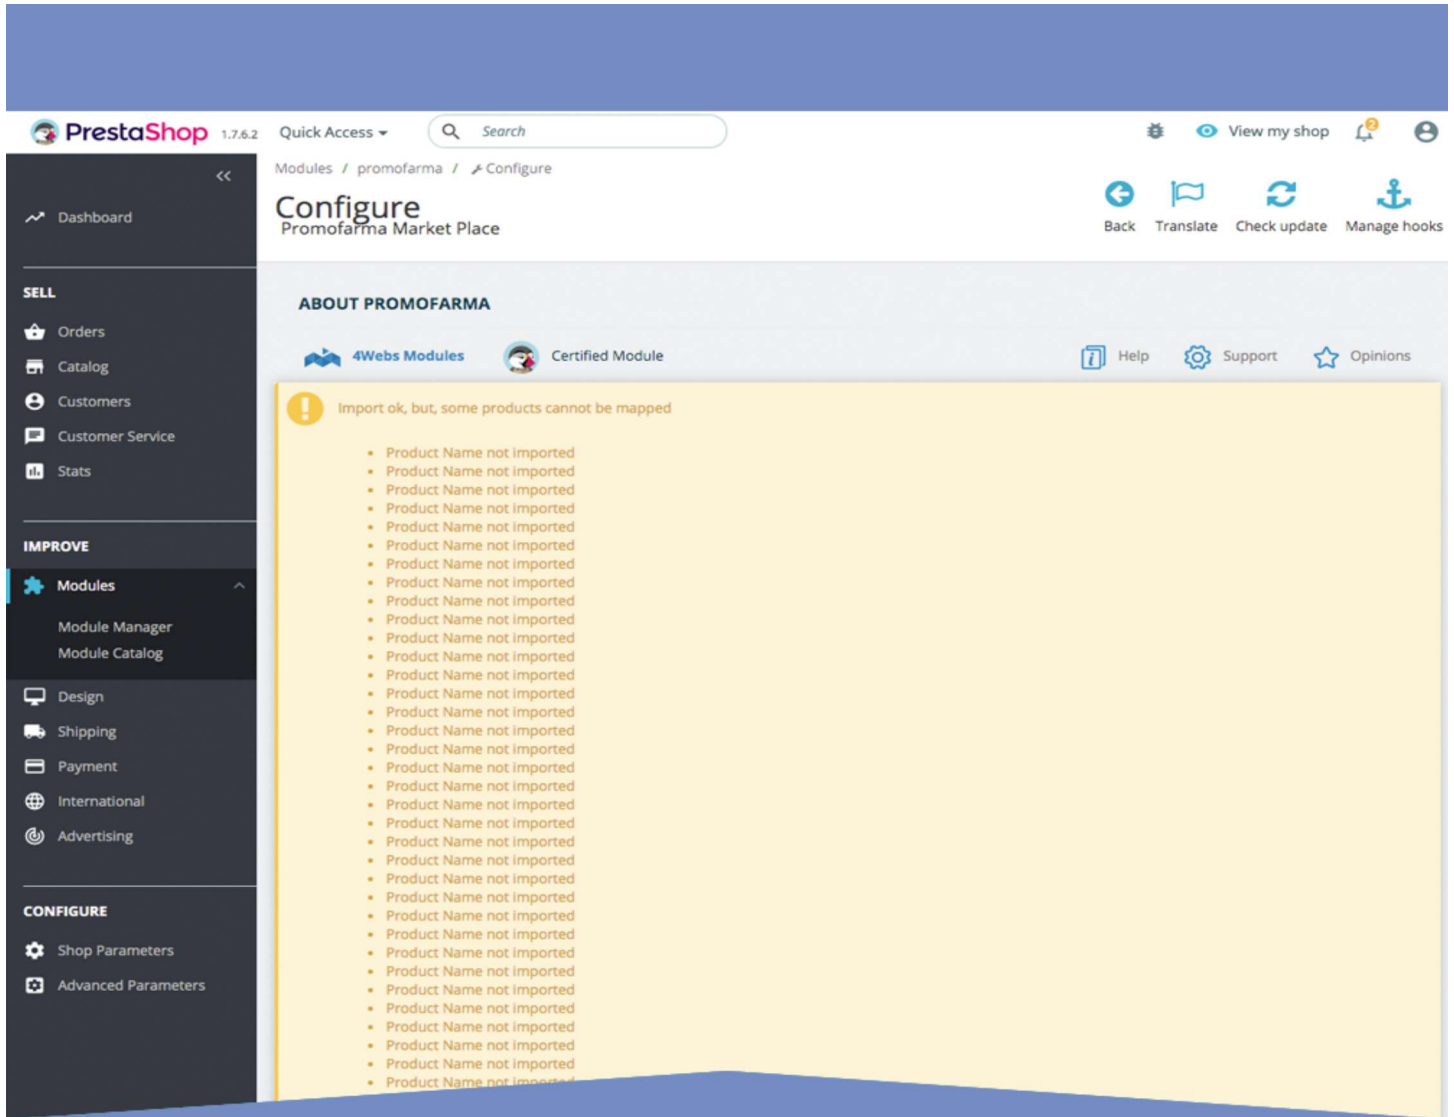

WHEN YOU IMPORT, YOU CAN SELECT THE METHOD TO DO IT,
ALSO YOU CAN CONFIGURE THE CLIENT TO LINK THE ORDER,
THE CARRIER AND THE ORDER STATUS

You can configure the customer that will be linked to the new order, the order status and the carrier linked to it.

Once you've configured that, the module is ready to import files from promofarma.

If the import ends without error, a green success message will be shown, but if there's some problem during the import you'll be notified with a yellow or red message.

In this case, the module will show a screen like this:

Configure
