Purpose and functionality

"Stock in products" is a module developed by 4webs that will allow you to show your customers the available stock of each of the products in your store.

Choose yourself the units of each product to which you want to associate each stock status (high, medium, low, without stock). When the real units of each product are within the established values, the corresponding status will appear on your front-end.

Favor the availability of your gender quickly, easily and visually

Technical description and requirements

VERSION: 2.0.1

COMPATIBILITY: 1.5.0.0 – 1.7.4.4

Installation and configuration

First, it is necessary to upload the module to the server. Later, you can find it in your module search and click on the option "Install". You can also access more quickly through the "Orders" section, in which you will find it integrated.

Next, a series of screenshots will be shown that will graphically explain the simple configuration and use process of this module.

Once installed, look for "Stock in Products" in your list of modules and access your options through the "Configure" button, indicated in the image below.

The screenshot displays the PrestaShop 1.7.4.4 interface for managing installed modules. The sidebar on the left contains navigation links for 'Dashboard', 'Orders', 'Catalog', 'Customers', 'Customer Service', 'Stats', 'Modules', 'Design', 'Shipping', 'Payment', and 'International'. The main content area is titled 'Manage installed modules' and features a search bar, filters for 'Categories' and 'Show all modules', and buttons for 'Last access' and 'Bulk Actions'. It lists '1 installed module' (Product chart stock) and '38 built-in modules' (Catalog evaluation, Customer accounts, Dashboard Products, Carrier distribution, and Dashboard Goals). Each module entry includes its version, developer, description, and action buttons like 'Configure', 'Upgrade', or 'Disable'.

Once inside the configuration options of the module, you can determine the quantities of your products to which you want to associate each stock status in the way shown below. Next to each state, the corresponding icon will appear in its front-end, these can be seen in the lower capture.

Configure Product chart stock

ABOUT OF PRODUCT CHART STOCK

PRODUCT CHART STOCK

Set quantity to full stock. (FULL STOCK)

1200

When stock quantity are between full stock quantity and low stock quantity. (MEDIUM STOCK)

2 AND 1200

Set quantity to low stock. (LOW STOCK)

2

When no have stock. (NO STOCK).

Update

DEFINITION OF QUANTITIES FOR EVERY STATE OF STOCK

1. Determine here the minimum amount of product to be associated with "FULL STOCK".
2. When the stock units are between the values established here, they will be associated with "MEDIUM STOCK".
3. Write here the quantity from which your products will be considered in "LOW STOCK".
4. When there is no existence, your products will be displayed in the state "NO STOCK".
5. Once you have finished writing your stock quantities for each state, update this configuration.

Once you have established your stock quantities, the status of it will be visible in each of the product listings in its front-end:

The screenshot shows a product page for a 'Hummingbird Printed Sweater'. The page layout includes a top navigation bar with links like 'Contacte con nosotros', 'Español', 'Moneda: EUR €', 'Iniciar sesión', and 'Carrito (0)'. Below this is a secondary navigation bar with 'my store' logo and categories 'CLOTHES', 'ACCESORIOS', and 'ART'. A search bar is also present. The main content area features a large image of the sweater on a hanger, a smaller thumbnail below it, and a detailed product description. The description includes the title 'HUMMINGBIRD PRINTED SWEATER', a price reduction from 43,44€ to 34,75€ (20% discount), and a 'Mucho stock' (Much stock) status. There are also social sharing icons and a section for policies like 'Política de seguridad' and 'Política de envío'. A blue banner at the bottom of the page reads 'AVAILABLE STOCK VISIBLE ON PRODUCT SHEETS'.
