Purpose and functionality

“Uvinum Market Place” is a module developed by 4webs with the purpose of allowing you to synchronize your stock automatically with sales in Uvinum. You can export the products of your store to this platform according to language and category. Also, you can relate the attributes of your products with those of Uvinum easily and simply.

In the same way, you can also multiply the prices of your products for Uvinum by the percentage that you determine.

Consequently, you will also have the possibility to generate XML files in which all exported categories and related attributes are listed, always having all the generated XML versions at your disposal.

Also, you will have a cron link that you can copy to your server so that the module performs daily cron synchronizations.

Other useful modules and support

Check out all our modules and get additional support in [our online store](#).

Technical description and requirements

VERSION: 1.0.0

COMPATIBILITY: 1.5.0.0 – 1.7.5.2

UPCOMING VERSIONS: Currently, we are in the development phase of order download from Uvinum to Prestashop.

Installation and configuration

First, it is necessary to upload the module to the server. Later, you can find it in your module search and click on the option "Install". You can also access more quickly through the "Orders" section, in which you will find it integrated.

Next, a series of screenshots will be shown that will graphically explain the simple configuration and use process of this module.

Once installed, look for "Uvinum Market place" in your list of modules and access your options through the "Configure" button, indicated in the image below.

The screenshot displays the PrestaShop 1.7.5.2 Module Manager interface. The top navigation bar includes the PrestaShop logo, version number, a search bar, and utility links like 'Debug mode', 'View my shop', and 'Help'. The main content area is titled 'Module manager' and features a sidebar on the left with navigation options under 'VENDER', 'PERSONALIZAR', and 'CONFIGURAR'. The central panel lists installed modules with their details and configuration options:

Module Name	Version	Developer	Description	Action
Uvinum Market Place	v1.0.0	4Webs	Allows the user to export products from the store into Uvinum compatible file.	Configure
Buy button lite	v1.0.1	PrestaShop	Increase your conversion rate and boost your sales, generate links and add them to your content so that visitors can easily proceed to checkout Read More	Configure
Social media follow links	v2.0.0	PrestaShop	Allows you to add information about your brand's social networking accounts. ... Read More	Configure
Social media share buttons	v2.0.1	PrestaShop	Displays social media sharing buttons (Twitter, Facebook, Google+ and Pinterest) on every product page. ... Read More	Configure

In the first configuration tab of the module ("Categories and Attributes") you will find, first, the export options of the module according to language and category, as specified below:

The screenshot displays the PrestaShop configuration interface for the Uvinum Market Place module. The interface is divided into several sections:

- Header:** Includes the PrestaShop logo, version 1.7.5.2, Quick Access, a search bar, and utility icons for Debug mode, View my shop, and Manage hooks.
- Left Sidebar:** Contains navigation menus for 'VENDER' (Pedidos, Catálogo, Clientes, Servicio al Cliente, Estadísticas), 'PERSONALIZAR' (Módulos, Catálogo de Módulos, Module Manager), 'Diseño' (Diseño, Transporte, Pago, Internacional), and 'CONFIGURAR' (Parámetros de la tienda, Parámetros Avanzados).
- Main Content Area:**
 - ABOUT UVINUM MARKET PLACE:** Shows '4Webs Modules' and 'Certified Module' badges, along with Help, Support, and Opinions links.
 - UVINUM MARKET PLACE Uvinum Market Place Configuration:** Features three tabs: 'Categories and Attributes' (highlighted with a blue circle and '1'), 'Price Multiplier', and 'CRON function & Generate XML'.
 - Language Selection:** A section titled 'Choose the language/s for which you wish to export the categories to Uvinum and assign attributes to the products'. It includes checkboxes for Español (Spanish), Inglés, Francés, Alemán, Italiano, Portugués, Neerlandés, Sueco, Norguego, and Danés. 'Español (Spanish)', 'Portugués', and 'Neerlandés' are checked.
 - SKIP PRODUCTS:** A section titled 'SKIP PRODUCTS' with a toggle switch set to 'No'. A note says 'Mark this option as YES if you want to skip products that are missing a value from the selected attributes.' This section is highlighted with a blue circle and '2'.
 - SELECT CATEGORY:** A section titled 'SELECT CATEGORY' with a note 'Products from selected categories will be exported to Uvinum'. It includes a 'Select All' button and a list of categories: Inicio, Clothes, Accesorios, and Art. 'Clothes', 'Art', and 'Select All' are checked. This section is highlighted with a blue circle and '3'.

PRODUCTS EXPORT TO UVINUM BY CATEGORY AND LANGUAGE

1. Mark at this point those languages from which you wish to export products to Uvinum and associate their attributes as explained on pages 6, 7 and 8 of this manual.
2. By activating this functionality, only those products that have at least one assigned Uvinum attribute will be exported.
3. In this case, select the categories and subcategories whose products will be exported to Uvinum. You can select them all in a single click by clicking the "Select All" button.

In the lower part of this section of "Categories and Attributes", you will find the options corresponding to the linking of attributes of your store with those of Uvinum.

In the first place, the `product_type` (indicated in point 1 of the lower catch) is the product family according to Uvinum. This must be linked to that family of our store that identifies the products according to the type. These families can be found in the "Catalog" section of their Prestashop side menu, then accessing "Attributes and characteristics" and finally "Characteristics". Keep in mind that if you change the family of the `product_type` by choosing another one in the drop-down indicated by point 2, all the attributes that have been associated following the steps that we define below will be eliminated, since we are going to relate the Uvinum `product_type` with another characteristic or family of our store.

The screenshot displays the PrestaShop configuration interface for the Uvinum Market Place module. The page title is "Configure Uvinum Market Place". The main section is titled "ASSIGN UVINUM ATTRIBUTES" with a subtitle "Assign Uvinum attributes to the ones in your shop by clicking on every one of them".

At the top of the configuration area, there is a row of dropdown menus: "product_type" (with a red dot), "Variedad / Tipo", "Vines", and "Select Uvinum Value". A button "Assign Closed Value" is located to the right.

Below this is the "Assignment Summary" section, which contains a table for "Vines":

Attribute Uvinum	Shop Attribute
Red	Torojo

Below the table, there are several rows of configuration options, each with a dropdown menu and a help icon:

- appellation**: Color
- bottle_volume**: Composición
- vintage**: Paper Type
- weight**: Frame Size

At the bottom of the page, a blue banner contains the text: "ATTRIBUTES ASSOCIATION OF THE STORE WITH THE ATTRIBUTES OF UVINUM".

Once we have associated Uvinum's product-type with a family from our store, we can link the attributes accordingly. To do this, click on the "Assign closed value" button (indicated with point 3), so that the attribute dropouts appear. In the drop-down indicated with point 4, we must choose the value of Uvinum to which we want to associate a corresponding value of our store. If in this drop-down menu we choose the option "Wines", which has other sub-attributes, the Uvinum value will be relatively related to the store value that we choose in the drop-down points indicated with points 5 and 6.

As you relate attributes, they will appear in the "Summary of the selection" indicated with point 7. Here you can eliminate the linking of attributes made globally (point 8) or individually (point 9).

Configure
Uvinum Market Place

ASSIGN UVINUM ATTRIBUTES Assign Uvinum attributes to the ones in your shop by clicking on every one of them

product_type Variedad / Tipo Vines: -- Select Uvinum Value -- Assign Closed Value 3

Assignment Summary 7

8 9

appellation Color ? 4 5 6

bottle_volume Composición ?

vintage Paper Type ?

weight Frame Size ?

ATTRIBUTES ASSOCIATION OF THE STORE WITH THE ATTRIBUTES OF UVINUM

In addition to the `product_type`, the attributes described below may be related to a single value of our store.

Configure Uvinum Market Place

Assign Uvinum attributes to the ones in your shop by clicking on every one of them

product_type Variedad / Tipo Vines -- Select Uvinum Value -- Assign Closed Value

Assignment Summary

Attribute Uvinum	Shop Attribute
Red	TRojo

10 appellation Color

11 bottle_volume Composición

12 vintage Paper Type

13 weight Frame Size

ATTRIBUTES ASSOCIATION OF THE STORE WITH THE ATTRIBUTES OF UVINUM

10. Select from this drop-down menu the family of your store that will be linked to the Uvinum attribute "appellation" (appellation of origin).

11. Select from this drop-down menu the family of your store that will be linked to the Uvinum attribute "bottle_volume" (size/capacity of the bottle).

12. Select from this drop-down menu the family of your store that will be linked to the Uvinum "vintage" attribute.

13. Select in this drop-down the family of your store that will be linked with the Uvinum attribute "weight" (weight of the product).

Next, if we access the second configuration tab "Price multiplier" we can insert a percentage value (point1) by which the prices of your products will be multiplied for sales made through Uvinum. To make this increase effective, you must save this value (point2).

The screenshot shows the PrestaShop administration interface. The top navigation bar includes the PrestaShop logo (version 1.7.5.2), a search bar, and utility icons for Debug mode, View my shop, and notifications. The left sidebar contains a menu with sections: 'VENDER' (Pedidos, Catálogo, Clientes, Servicio al Cliente, Estadísticas), 'PERSONALIZAR' (Módulos, Catálogo de Módulos, Module Manager), 'Diseño' (Diseño, Transporte, Pago, Internacional), and 'CONFIGURAR' (Parámetros de la tienda, Parámetros Avanzados). The main content area is titled 'Configure Uvinum Market Place' and includes a breadcrumb trail: 'Módulos / uvinummarketplace / Configure'. Below the title are utility buttons: Back, Translate, Check update, and Manage hooks. The configuration area is divided into three tabs: 'Categories and Attributes', 'Price Multiplier' (selected), and 'CRON function & Generate XML'. The 'Price Multiplier' tab contains a text input field with the placeholder 'Please introduce a number between 0% and 100%' and a value of '1'. A 'Save' button is located in the bottom right corner of the configuration area, highlighted with a blue circle and the number '2'. The bottom of the image features a blue banner with the text 'POSSIBILITY OF INCREASING PRICES FOR SALES THROUGH UVINUM'.

By going to the last configuration tab "Function Cron and Generation of XML", you will be able to obtain the XML files that collect all the list of products and attributes made in "Categories and Attributes" (see pages 6, 7 and 8 of this manual). You can also obtain the cron link for automatic synchronization with Uvinum.

CRON FUNCTION AND XML GENERATION WITH THE SELECTED ATTRIBUTES

- 1-2. To generate the XML file with all the attributes relation carried out, press the "Generate XML" button. At the bottom, indicated by point 2, a list of download links will appear for each of the times you click on the generate XML button, you can always access previous versions and keep the changes of attributes made in "Categories and Attributes".
3. At this point, you will find the link that you must copy and paste on your server so that the daily synchronization of your store with Uvinum is carried out automatically.

Notes to developers

This module does not modify any controller or intervene in any critical Prestashop process.
